PROJECT PLANNING

Bathroom products guide

A practical checklist for discussing your project requirements.

01 Project information

- List product types, models where known, locations, quantities, finishes and installation scope.
- Consider water supply, installation interfaces, access and project accessibility requirements.

02 Selection and coordination

- Compare tapware, showers, screens and accessories with project drawings and intended use.
- For regulated plumbing products check applicable WaterMark and WELS information for the exact model.

Share drawings, location, quantities and your programme with the KOHL team.

03 Documents to discuss

- Current product information, drawings, installation and care instructions.
- Relevant model-specific registrations, warranty and spare-parts information.

04 Project review

- Confirm each product and its supporting documentation against the intended application.

Discuss your project

Contact our team with your project brief and the information available. Product selection, documents and responsibilities are confirmed against the specific project.
