PROJECT PLANNING

Outdoor blinds & screening guide

A practical checklist for discussing your project requirements.

01 Project information

- Record opening dimensions, site location, building height, exposure and structural substrate.
- Identify coverage, desired operation, access needs and interfaces with existing structures.

02 Selection and coordination

- Discuss fabrics, tracks, controls and finish options with the project team.
- Confirm wind exposure, fixing and operating limitations for the exact product and site.

Share drawings, location, quantities and your programme with the KOHL team.

03 Documents to discuss

- Product-specific information, drawings and installation instructions.
- Relevant performance evidence and project-specific engineering advice as required.

04 Project review

- Confirm suitability for the selected location, application and operating conditions.

Discuss your project

Contact our team with your project brief and the information available. Product selection, documents and responsibilities are confirmed against the specific project.
