PROJECT PLANNING

Wall panels & surfaces guide

A practical checklist for discussing your project requirements.

01 Project information

- Identify application, wall construction, substrate, dimensions, site environment and finish.
- Distinguish internal and external use, wet and dry areas, and project-specific requirements.

02 Selection and coordination

- Discuss panel composition, profiles, accessories and the proposed fixing method.
- Review waterproofing, fire and moisture requirements for the complete assembly where applicable.

Share drawings, location, quantities and your programme with the KOHL team.

03 Documents to discuss

- Product data and manufacturer installation instructions for the exact panel and fixing system.
- Relevant performance evidence appropriate to the product, assembly and application.

04 Project review

- Confirm the complete assembly and interfaces with the relevant project professionals.

Discuss your project

Contact our team with your project brief and the information available. Product selection, documents and responsibilities are confirmed against the specific project.
